V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-7	YES
	Claims		NO
Inventive step (IS)	Claims		YES
	Claims	1-7	NO
Industrial applicability (IA)	Claims	1-7	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

JP 7-236680 discloses a pressing device having emitting members(4) which can be considered to play a role as projections on the cover(2), having moving members(6) which can be used as a weight within the said cover(2), and having a belt(31) which can be used to tighten the said cover to the waist. (see figure 13)

The difference between the prior art and the present invention is the fact that the prior art simply puts the weights(the moving members) into the cover, whereas the present invention uses screws to affix the weights to the plate. But this difference can be easily inferred by a person skilled in this art. Therefore Claims 1-7 lack an inventive step.
